

## Press release

### REGGIANI PRESENTS THE NEWEST ADD TO THE YORI FAMILY: YORI IP66 IS BORN FOR OUTDOOR LIGHTING

*Advanced technology meets discreet design: Reggiani presents Yori IP66 system of projectors ensuring quality lighting for landscape projects.*

The Yori projectors family has widened with Yori IP66, the newest system of projectors for outdoors quality lighting. Selected materials, IP66 rating and CRI>90 make Yori IP66 a reliable system for high-end outdoor lighting projects.

The new Reggiani Yori IP66 is available in two different dimensions, Ø45 and Ø60, and ten color finishes varying from copper, bronze, champagne and olive green among others, in order to fulfill any requirement in high-end landscape contemporary projects. A wide selection of accessories beautifully integrates the product range into any project. The spikes system is designed for gardens and walkways, while beam clamps and tree straps give the possibility to create an accent lighting system according to the needs of the project. Moreover, the system can be declined also in Surface/Pendant and Wall version to complete the project.

*"Yori IP66 represents the desire to offer quality lighting solutions in high-end landscape projects. The system, in addition to the implicit high reliability, robustness and the recent Eco-friendly design guides, follows the same technical principles and aesthetic cleanliness shared by the Yori indoor lighting system, guaranteeing an exceptional lighting result. The novelty of Yori IP66 marks an important step for Reggiani in outdoor lighting".*

Roberto Martello  
Corporate design Director

Precision lenses offer quality distribution of light and smooth edge beams in line with the standard Yori optics. The wide range of color temperatures with CRI>90 ensures high quality light and consistency between internal and outdoor spaces. Upon request, Yori IP66 is available with index CRI>80: a perfect compromise between an high quality lighting solution and efficiency. It's possible to further personalize the system with coloured lenses and filters to make the lighting unique.

The "No-risk" technology guarantees a protection integrated system that provides full safety to the LED source and all the electronics components of the IP66 system: these features make

Yori IP66 a reliable and resistant product in any weather condition, and assure protection against water, polarity inversion and spikes of the input voltage.

All products of the Yori IP66 range are machined from solid and are anodized or galvanized. The aluminium chosen for Yori IP66 presents excellent qualities in terms of corrosion resistance, surface hardness, wear/abrasion resistance and aesthetic durability. In addition to the anodized aluminium versions, Yori IP66 is also available in solid brass and stainless steel.

Designed for external use, Yori IP66 has a particular attention for the environment. The components are separable to guarantee reparability of the product in case of damage or they can be easily replaced to update the product. The separability of the components makes it possible to sort them correctly and therefore guarantee a sustainable end of life of the product.
